

Lifespan Approach Workshop Objectives

Participants are able to:

- Explain the DIR-based developmental approach to evaluation as it relates to adults with special needs
- Apply the principles of Floortime to treating adults with special needs
- Use Dr. Greenspan's Guiding Principles to develop social and functional language and cognitive skills in lower-functioning adults
- Describe the concept of a "Learning Community" and how the Guiding Principles can promote learning, cognitive development, and independence in work and living environments across the lifespan
